

SKIJAPAN JUNIOR TRAINING ACADEMY

FREESTYLE / MOGUL CAMP 2017

The Focus for the Niseko Mogul Camp is to Harness our Strengths and Improve our Weaknesses, working individually with each athlete to help them recognize and achieve their goals. Improving Airs will be a major focus of the training sessions. Niseko's soft springtime snow conditions make improving and learning new tricks far less intimidating. Our very own air site will be built to meet the specific needs of the session's participants. We will also use the terrain park's varied sized jumps and a jump into a mogul line to work on skiing out.

Towards the end of the season the large areas of the resort turn into a mogul playground. A big part of the camp will be spent lapping these huge natural bump fields. We will work on skiing fast and aggressive, whilst at the same time incorporate good stance, correct turn shape and a dynamic absorbtion range. The Mogul lines we will train on vary

in shape, bump size and steepness, great for developing mogul skiing skillsets. The groomers at Niseko are equal to any resort in the world. Long and immaculately maintained they are perfect for refining technique and improving skiing fundamentals that are essential for a developing competitive mogul skier. A reasonable amount of time will also be

spent exploring the resort. From the forests to the natural half pipes and every drop in between we will shred all the righteous zones.
